📄 ABOUT

- After years as an IT consultant, I've traded my tech hat for a full-stack developer's cap, driven by a genuine passion for crafting digital experiences. I've danced through the intricacies of diverse systems, both hardware and software, all while keeping my eyes on delivering top-notch user experiences.
- Web development is my primary focus, where I channel my drive to create not just functional but genuinely enjoyable products. I'm all about the nitty-gritty details and thrive on communicating effectively to make tech talk understandable.
- In my IT journey, I became the go-to person for untangling complex systems and making them work like a symphony. Now, I'm excited to bring that problem-solving spirit to web development, creating user-friendly solutions that pack a punch.
- Beyond the code, I'm eager to soak up more knowledge and hands-on experiences in this ever-evolving tech world. If you're looking for a developer who blends IT wisdom with a fresh web-focused perspective, I'm ready to dive into the next exciting challenge.

📁 PROFESSIONAL EXPERIENCE

Northcoders, Web Development

Feb 2023 - May 2023 | London, UK

- Immersive 13-week bootcamp designed to equip aspiring tech professionals with the skills and knowledge they need to succeed in web development.
- With a focus on progressive learning, the program is packed with daily tasks, mini-projects, and portfolio-worthy material that challenges and inspires students every step of the way.
- Intense and rewarding, with a comprehensive curriculum and a hands-on learning approach that provided practical experience in web development. The knowledgeable teachers and tutors were always available to offer guidance and support, helping me to build a strong portfolio and gain valuable insights on how to learn more efficiently.
- Thanks to Northcoders, I now feel fully job-ready and confident in my ability to tackle complex web development challenges. The experience has been transformative, not just in terms of my technical skills, but also in terms of my mindset and approach to learning. I would highly recommend this bootcamp to anyone looking to break into the tech industry and make a meaningful impact.

Mac-Seven, IT Consultant

Jul 2018 - Oct 2022 | London, UK

- Worked as an IT consultant with a range of clients across various industries
- Gained valuable experience with Mac-Seven, a leading managed service provider serving diverse clients including schools and businesses
- Provided remote IT support and managed a wide range of systems, including Windows and Mac machines, and oversaw server, firewall, hardware, and software maintenance
- Developed an extensive knowledge of various company setups and acquired a comprehensive understanding of the intricacies of IT management
- Honed skills in managing and troubleshooting IT issues
- Confident in leveraging expertise to make valuable contributions to any tech role

📁 PROJECTS

Portfolio 📄

Windows98 Style Portfolio, Personal portfolio website with a nostalgic Windows 98 feel. Just a fun project 📄
[Javascript React/Vite]

Pizza Shop, Pizza shop that pulls menu from API, UI state management with Redux. Geo-positioning during final checkout. 📄
[Javascript TailwindCSS React REST API Redux]

AI Face Recognition, Using Clarifi API for face detection, will outline matches using AI 📄
[Javascript React Express Nodejs PostgreSQL Knex]

Blocklist, Mobile application for interactive task management 📄
[Flutter Supabase Typescript Prisma]

JSON Formatter, Fixes/formats JSON data, also helps the user find the specific path for their API to use for their fetch. At first made this tool solely for myself 📄
[Javascript React]

📄 TECH STACK

Frontend (HTML, CSS, Javascript, Axios, React+Redux, TailwindCSS, Framer Motion)

Backend/Data (Nodejs, Express, PostgreSQL, Supabase, MongoDB)

Misc (Git, Github, Jest, Vercel, Render, Astro)
