📁 Projects

Portfolio ↗
Please visit my portfolio page, including everything on my CV

WorldWise,
Javascript, React, Context, useReducer ↗
Website with an interactive map+form that will allow users to track their trips along with notes about the city

AI Face Recognition, *Javascript | React | Express | Nodejs | PostgreSQL | Knex* ↗
Using Clarifi API for face detection, will outline matches using AI

Blocklist, *Flutter | Supabase | Typescript | Prisma* ↗
Mobile application for interactive task management

Windows98 Style Portfolio,
Javascript, React/Vite ↗
Personal portfolio website with a nostalgic Windows 98 feel. Just a fun project

JSON Formatter, *Javascript | React* ↗
Fixes/formats JSON data, also helps the user find the specific path for their API to use for their fetch. At first made this tool solely for myself

Crypto Tracker, *Javascript | React | REST API* ↗
Live crypto app fetching data from CoinGecko

💼 Professional Experience

Northcoders, *Web Development*
Feb 2023 – May 2023 | London, UK

- Immersive 13-week bootcamp designed to equip aspiring tech professionals with the skills and knowledge they need to succeed in web development.
- With a focus on progressive learning, the program is packed with daily tasks, mini-projects, and portfolio-worthy material that challenges and inspires students every step of the way.
- Intense and rewarding, with a comprehensive curriculum and a hands-on learning approach that provided practical experience in web development. The knowledgeable teachers and tutors were always available to offer guidance and support, helping me to build a strong portfolio and gain valuable insights on how to learn more efficiently.
- Thanks to Northcoders, I now feel fully job-ready and confident in my ability to tackle complex web development challenges. The experience has been transformative, not just in terms of my technical skills, but also in terms of my mindset and approach to learning. I would highly recommend this bootcamp to anyone looking to break into the tech industry and make a meaningful impact.

Mac-Seven, *IT Consultant*
Jul 2018 – Oct 2022 | London, UK
- Worked as an IT consultant with a range of clients across various industries
- Gained valuable experience with Mac-Seven, a leading managed service provider serving diverse clients including schools
and businesses
- Provided remote IT support and managed a wide range of systems, including Windows and Mac machines, and oversaw server,
firewall, hardware, and software maintenance
- Developed an extensive knowledge of various company setups and acquired a comprehensive understanding of the intricacies of IT management
- Honed skills in managing and troubleshooting IT issues
Confident in leveraging expertise to make valuable contributions to any tech role

🪪 About

As a seasoned IT consultant with a client-centric approach, I embody a deep enthusiasm for programming and an unwavering commitment to delivering exceptional results. Drawing from extensive work experience and personal passions, I have honed a strong expertise in managing diverse systems and overseeing company structures, encompassing both hardware and software realms. This proficiency is complemented by meticulous attention to detail and adept communication skills, ensuring consistently outstanding user experiences.

My primary interest lies in web development roles, where I channel my drive to craft user-friendly and impactful products. Fueled by an enduring passion for programming and a steadfast focus on delivering high-quality outcomes, I am well-suited for positions within the tech sphere. I eagerly anticipate the opportunity to further expand my programming knowledge and hands-on experience as I continue on this trajectory.
